Sketches

Sketches of website screens with generated components and features from brainstorming.

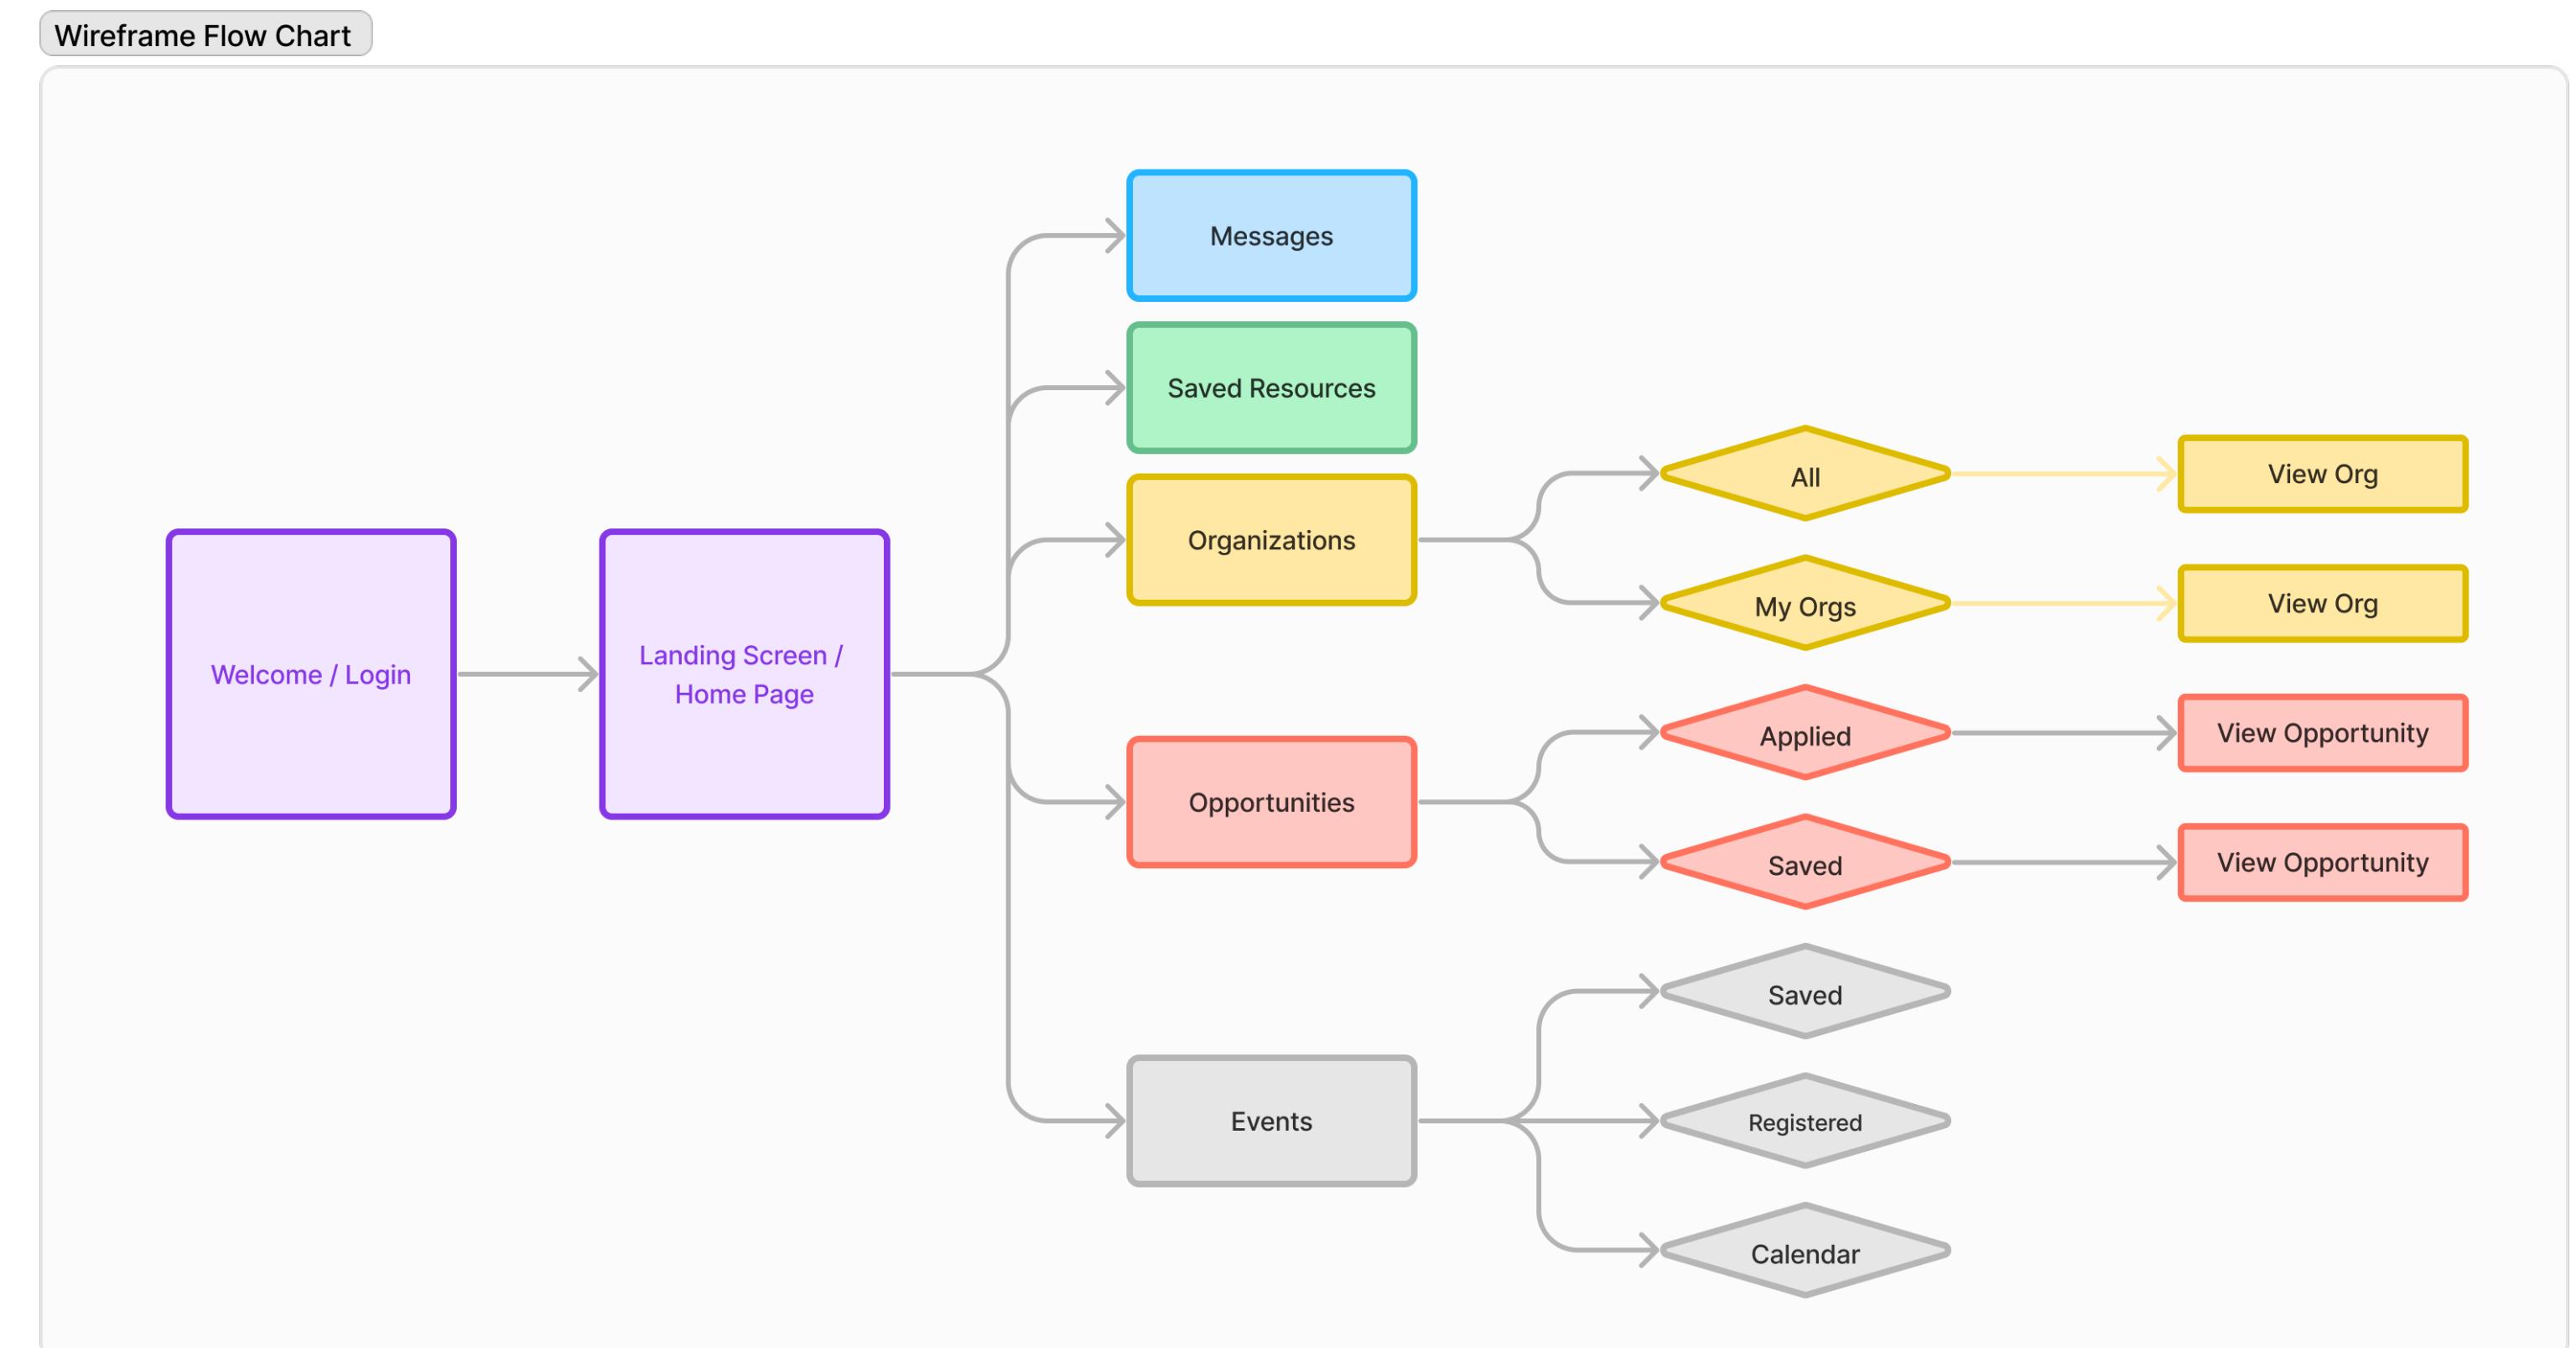

Wireframes

The user is greeted with the login page, which then brings them to the landing screen once they have logged-in using their school credentials.

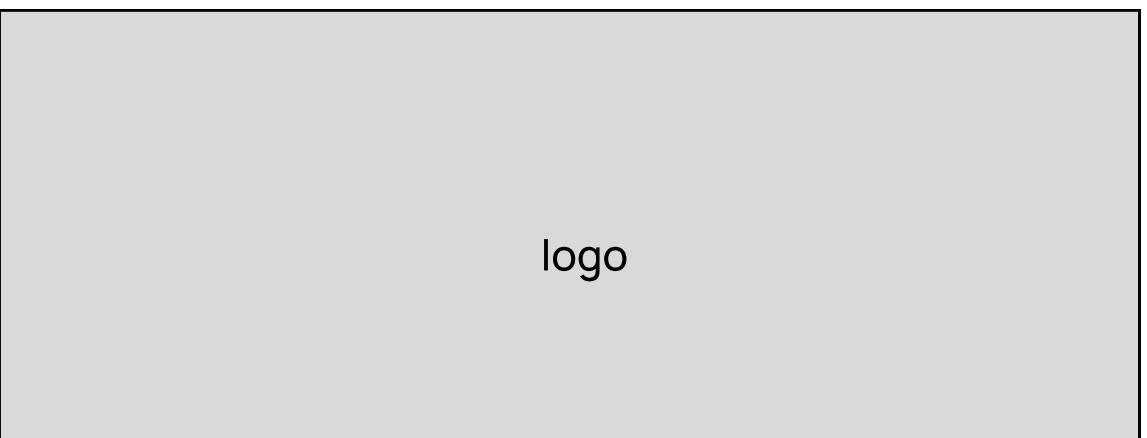

From the landing screen/home page, there are five main flows that a user can take:

1. Messages
2. Saved Resources
3. Organizations
4. Opportunities
5. Events

Some flows are broken down even further into sub-flows, such as saved, applied, registered, etc.

Messaging

The wireframe illustrates a messaging application interface. On the left, a sidebar contains a logo icon and a list of navigation items: messages (selected), saved resources, organizations, opportunities, and events. The main area is titled "Messages". It features a search bar for conversations and a compose button. Below these are four message bubbles from a user named @lsampuw. The messages are: "Hi I am wondering what days you...", "Thank you for reaching out, we are...", "Awesome, I'll see you then", and "Sorry, please reach ...". A text input field at the bottom allows users to type their message and send it via a right-pointing arrow icon.

Organization Hosting

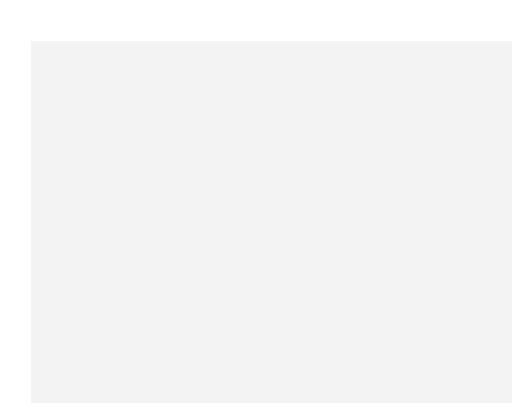

Lore ipsum is simply dummy text of the printing and typesetting industry. Lore ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged.

Organizations

The screenshot shows a mobile application interface for managing organizations. On the left is a sidebar with a light gray background containing a logo icon and five navigation items: messages, saved resources, organizations (which is selected and highlighted in dark gray), opportunities, and events. The main content area has a white background and features a header with the title "Organizations". In the top right corner of the header are two circular icons: one labeled "notif" with a small black dot indicating notifications, and another labeled "profile pic" for profile picture. Below the header are two buttons: "All" and "My Orgs". A search bar with a magnifying glass icon and the placeholder "Search" is positioned above a "Filter" button. The main content displays four organization cards, each with a title, category, a short description, and a "View" button. The organizations listed are: Husky Math Club (Academic), AI @UW (Engineering), Bird Club at UW (Sciences), and DubHacks (Engineering). A large black downward-pointing arrow is located at the bottom center of the main content area.

Louis Stokes Alliance for Minority Participation

[Message](#)

About Us

The Louis Stokes Alliance for Minority Participation (LSAMP) is designed to increase the quality and number of students from under-represented minority groups who complete undergraduate degrees in science, technology, engineering, and mathematics (STEM). This program is funded by the National Science Foundation with the long-term goal of increasing the number of under-represented students who enter STEM professions and who earn doctorates in the STEM fields. LSAMP Alliances across the country are designed to provide support services at many levels to help interested students succeed in STEM majors and careers and to provide networks with other LSAMP Scholars.

Location

Mary Gates Hall 311

Opportunities

The wireframe shows a navigation sidebar on the left containing a logo, messages, saved resources, organizations, opportunities (which is selected), and events. The main content area has a header with 'Opportunities', a search bar, and filter buttons for 'Job Feed', 'Applied', and 'Saved'. Below this is a section titled 'New Jobs For You' featuring three job card snippets for 'Research Intern' at Microsoft in Bellevue, WA, posted 3 days ago. Each snippet includes a description of research internships at Microsoft. At the bottom of this section is a 'View more jobs →' button. The next section is 'Resources' with three resource cards for 'How to Write a Resume That Stands Out' by CC@E Admin. At the bottom of this section is a 'View more resources →' button. A large downward-pointing chevron icon is located at the bottom center of the main content area.

Opportunities - Applied Opportunities

The screenshot shows a user interface for managing applied opportunities. On the left, a sidebar lists navigation items: Logo, messages, saved resources, organizations, opportunities (which is selected), and events. The main area is titled "Applied Opportunities" and includes a search bar and filter button. It is divided into sections for "Last Week" and "Older". Each section displays three opportunities, each with a title, status (e.g., Applied or Declined), company (Microsoft), location (Bellevue, WA), date applied (e.g., 3 days ago or April 11), a description snippet, and a "View" button. A large downward arrow icon is centered at the bottom of the older section.

Research Intern

Microsoft
Bellevue, WA

Posted 3 days ago

Apply

Description

Research Internships at Microsoft provide a dynamic environment for research careers with a network of world-class research labs led by globally-recognized scientists and engineers. Our researchers and engineers pursue innovation in a range of scientific and technical disciplines to help solve complex challenges in diverse fields, including computing, healthcare, economics, and the environment.

Our team in Microsoft Azure AI is working on cutting-edge NLP and deep learning models to power Microsoft AI products and build it as a service to serve many internal and external applications. The team focuses on applying deep learning techniques to solve AI problems such as Natural Language to Code, efficient adaptation of large-scale language models, question answering on structured data, such as the no-code/low-code AI models in Power Platform, the copilot project via the collaboration with Github, as well as applying large scale models such as GPT-3 & Dall-E 2, and reinforcement learning for various exciting products and AI service.

We are a hybrid team at the intersection of applied research and product, with positions ranging from researchers and applied scientists to software engineers. Our team has the flexibility to tackle challenging and exciting research problems that are highly related to product requirements. For this position, we are looking for a research intern to work on large-scale language models for natural language and diffusion model for guided image generation.

We also have publication in top conferences as a byproduct and provide opportunities to collaborate with professors and students at top universities. You may also see some of our recent papers such as LoRA, DeBERTa and R-Adam.

Responsibilities

As a research intern, you will collaborate with your mentor along with other researchers and data scientists to work on a research project that is highly related to our products. You will gain working experience on large-scale models and join discussions on research progress updates. This is a 12-week full-time internship, and we expect you can be 100% dedicated to the project and finish a research work with a solid writing...

Events

The image shows a wireframe of a user interface for an events platform. On the left, a vertical sidebar contains a logo icon and five navigation items: messages, saved resources, organizations, opportunities, and events, with the events item being selected. The main content area has a header with the title "Events", a search bar, and two status buttons: "Saved" and "Registered". It also includes a "Filter" button and a calendar icon. Below the header, there are eight event cards, each representing a "STEM Career Fair" on April 30, 2023, at the HUB Ballroom at 10:00 AM. Each card features a "Register" button. A large downward-pointing arrow is located at the bottom center of the main content area.

Events - Saved Events

The screenshot shows a mobile application interface for managing saved events. On the left is a vertical sidebar with a light gray background. At the top of the sidebar is a white rectangular box labeled "Logo". Below this are five circular icons, each with a small white dot in the center, corresponding to different types of saved items: "messages", "saved resources", "organizations", "opportunities", and "events". The "events" icon has a dark gray dot, indicating it is selected. To the right of the sidebar is the main content area, which has a white background. At the top of the main area is a header with the title "Saved Events" in bold black font. To the right of the title are two buttons: "Saved" and "Registered". Further to the right are three circular icons: "notif" with a black dot, "profile pic", and a calendar icon. Below the header is a search bar with a magnifying glass icon and the placeholder text "Search". To the right of the search bar is a "Filter" button with a calendar icon. The main content area displays four event cards, each representing a "STEM Career Fair". Each card includes the event name, date ("April 30, 2023"), location ("HUB Ballroom - 10:00 AM"), and a "Register" button at the bottom. The event cards are identical except for their position.
